Öztek

Group of Companies

Öztek Group of Companies grows uninterruptedly in textile, technical textile, ready-made clothing, construction, free zone investments and administration industries since 1978.

Öztek Group of Companies is dedicated to bring in national services with highest quality and output in its investments and sectors it engages in. In return, it is rewarded as being a significant player in national and global economy.

Öztek Garment Co.

Having founded in 1978, Öztek Garment Co. has been the pioneer of the Turkish garment industry with its know-how and experiences. Öztek Garment Co. achieved this success through specialization on dying, printing and clothing of woven and knitted fabrics. Offering graphic and apparel designing, Öztek produces 2.500.000 garments per month at its cloth manufacturing facilities installed on a total area of 20.000 m². Concentrated on the categories of female and male clothing of woven and knitted fabrics, Öztek Garment Co. develops around 200 new designs per month at its owned.

Öztek Textile Co.

Founded in 1995 in Çorlu, Tekirdağ with the objective to serve internationally and make world class production, Öztek Textile Factory Co. has been collectively and continuously producing and developing at its facilities that cover a total area of 170.000 m² with more than 600 employees. Öztek Textile Factory Co. has achieved to combine its two separate brands serving in different fields: SPECTRA, producer of innovative and technological products in the technical textile field and STAMPA, the leading brand in fashion textile, in the same production line. SPECTRA has received various special production certificates like the Nato Security Certificate and thus proved that it has the corporate understanding and quality to work with NATO members and other developed countries.

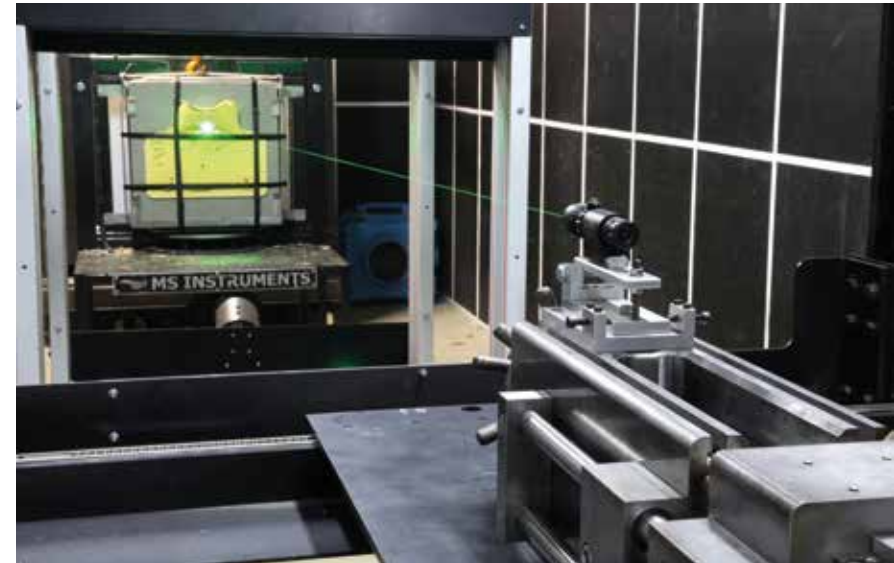

Spectra

Öztek Textile Factory Co. manufactures high nanotechnology fabrics and readymade clothing for military and security areas through SPECTRA production line. It contributes to the defence industry by using state-of-the-art systems in fabrics and ready-made clothing.

Security and R&D Activities

Manufacturing high-strength multi-spectral camouflage nets that allow invisibility on radar and thermal camera, multilayered ballistic protecting plates and wearable ballistic systems; SPECTRA carries on with its activities through large-scale R&D investments. Thanks to R&D investments, wholistic quality controls are performed with due diligence and outputs are delivered safely to the business partners across the world.
