EV Charging for Healthcare

Healthcare organizations are major employers and often viewed as local community leaders committed to public wellbeing. Frequently they are recognized for making contributions to the health of their local communities.

Providing EV charging stations is a natural complement to existing environmental and sustainability efforts and showcases the facility's commitment to health, wellbeing and green initiatives in its community.

Be a Leader for **A GREENER COMMUNITY**

- Add a green component to the overall perception of the facility
- The availability of charging stations communicates that your organization stays on the leading edge of technology
- Provide a valuable amenity for doctors, nurses, staff, patients, and visitors who drive electric vehicles
- Provide a turnkey solution for employees' requests for EV charging
- Demonstrate leadership in adopting advanced technologies
- Help improve air quality and reduction of CO² emissions near sensitive communities

The Blink Healthcare Solution

Throughout the United States healthcare providers are turning to Blink to help them install EV charging stations across their facilities helping to provide a cleaner and greener local community.

Blink IQ 200 charging stations are ideal for healthcare providers offering maximum flexibility and control.

- Works on all electric vehicles (Tesla adapter may be required)
- Billing can be time-based, kWh-based, session-based, or even can be set as a complimentary benefit
- Easy payment options via RFID, Apple Pay, Google Wallet and all major credit cards
- Centrally manage your EV charging stations via the Blink Network
- Text and email alerts inform EV drivers of the charging status
- Networked solution allows for full control, monitoring and reporting of EV station usage
- Dynamic load management allows you to maximize usage
- EV charging stations can contribute to LEED certification
- 24/7 customer service for EV drivers and station hosts
- Fully customizable pedestal wraps for branded messaging

Assessing Employee Need

An employee survey is a good place to start when assessing current and future demand for EV charging stations for your doctors, nurses and administrative staff.

Survey Question Examples

- Do you or anyone in your household own a plug-in hybrid electric vehicle (PHEV) or battery electric vehicle (BEV)?
 - If yes, where do you charge your vehicle most often?
- Are you considering leasing or purchasing an EV in the next year?
- Is having access to EV charging at work a deciding factor in your lease or purchase an EV?
- If EV charging is available at your workplace, how likely are you to charge there?
- Do you feel your organization should do more to support green energy within the community?
- Do you feel offering EV charging stations is an important employee and visitor benefit?

Assessing Visitor & Guest Needs

It may be helpful to inquire with facilities management and valet staff as to the number of electric vehicles they see frequenting your facility.

As research indicates EV adoption is growing exponentially therefore it is best to plan for the future when deploying EV charging stations.
